## **RoPay and RoPay Alias in BT Pay: instant transfers via QR code and phone number**

Banca Transilvania integrates the RoPay and RoPay Alias features into the BT Pay app, offering customers a new way to transfer money directly from their phone — without needing an IBAN.

With RoPay, individual customers can transfer money by scanning a QR code, making face-to-face transfers quick and easy. With RoPay Alias, they can send money instantly, free of charge, 24/7, using just a phone number.

Both options are available in the BT Pay app under the Accounts menu. More details can be found on the Întreb BT platform or on the BT website, using the AI Search feature.

### **RoPay Community**

These new BT Pay features are made possible by Banca Transilvania's participation in the national instant payments system RoPay, developed by TRANSFOND in partnership with the Romanian Banking Association.

Together with other banks that have joined the RoPay system, Banca Transilvania is contributing to the development of a national instant payments service, making interbank transfers simpler than ever.
